

WE GPSC 8000
GPS/GPRS vehicle tracking ET8000

The GPSC 8000 is a web-based vehicle tracking and alarm system. With remote voice monitoring, and convenient wireless phone dial in/out, easy installation, it gives users a peace-of-mind solution to guard their vehicles. We offer a turnkey tracking solution, beside the tracking hardware unit; we support the web-hosted tracking software which works with many mapping format, MapInfo, ERSI and Google maps. It can monitor up to 2000 vehicles at the real time.

- Location and tracking by: vehicle ID, real time position, time, speed, direction, alarm trigger.
- Speeding report when vehicle runs over a pre-set speed parameters.
- Geo-fencing report when vehicle go in/out of pre-defined areas.
- Anti-hijacking function. When vehicle has been hi-jacked, users can send command to cut the oil and power, in 5 minutes, vehicle stops slowly by its own. The command can be released by 3 options: 1. From control center software; 2. Mobile phone message & call; 3. RF transmitters.
- Low voltage alert to control center or users' mobile phone when voltage is below the normal level.
- Low power alert before the battery dies out. The alert will send to control center or users' mobile phone.
- Panic warning. System will give a voice warning to in-vehicle theft under the command from users or control center. A 2-way conversation can also be carried out.
- Voice monitoring to the in-vehicle status without the criminal's notice.
- Intelligent self-check of if the vehicle is in good working condition.
- Alternative GSM location when vehicle goes into downtown block area without GPS signal,
