WE GPSM 300

GPS/GPRS/SMS Motorcycle tracking and alarm

The **GPSM 300** is a comprehensive Mini Universal Security and Tracking System, specially designed for motorcycle, or assets tracking and security. Using SiRF III GPS module and tri-band GSM/GPRS module, the Mini Security tracker can perform security and tracking for all over the world. Further with compact size, 100% waterproof, vibration proof, and easy operation features. The GPSM 300 can have many extensions, such as: hands-free speaker, MDT display, Dial pad, card reader, and data logger, etc. The MC300 has been integrated with our Internet Control Center software for security, Tracking, Dispatching, Fleet Management, and Taxi Dispatching purpose. You can also send commands to the MC300 to control the car to satisfy all requirements.

Features:

- *Primarily using GPRS for reporting, you can choose 2 different server/IP for reporting. If GPRS is not available, then it switch to SMS communication automatically. You can choose reporting time interval for both GPRS and SMS.
- *SOS emergency button on the remote for help.
- *Anti-theft reporting, it can be linked to different sensors and car alarm for reporting.
- *Four preset numbers for remote listening or two-way talking
- *100% waterproof, vibration proof
- *Automatic power saving after ACC OFF
- *Wide input power range (DC 10V~30V), good for any vehicle
- *Easy DIY installation and hiding

WISE EYE Integrated Security Solutions

- *Using Tri-band 900/1800/1900 MHZ GSM/GPRS module for world wide tracking
- *Using super sensitivity GPS module
- *If GPRS is not available, it will store GPS data in the memory. When GPRS is available, it will report immediately.
- *When in GPRS roaming, it will switch to economical mode for data reporting automatically.
- *Parking Geo-fence reporting and driving Geo-fence reporting
- *Very accurate GPS mileage reporting.
- *GPS, GSM and system operation status LED display
- *Using SIM Card phone book to set reporting numbers and parameters to make the setting easy.
- * Immobilization function
- *Door open/close control from the control center
- *Can connect to traditional home alarm system to add GSM reporting function
- *Embedded vibration sensor for easy anti-theft reporting
- *Can add microwave sensor for complete anti-theft reporting
- *Embedded 750 mah rechargeable battery to provide main power cut reporting
- *Can choose hands-free speaker and MDT display to communicate with the control center
- *Can connect to PDA for navigation
- *Can use RF remote for driver ID reporting

Specification:

- *Dimension : 98mm x 72mm x32mm.
- *Weight : 300g±0g
- *Power input : DC 10V~30V
- *GSM frequency : Tri-band 900/1800/1900MHz
- *Battery : 750mah (Rechargeable)
- *Power Consumption : Power saving mode < 20ma, standby <120ma , max. Power <250ma
- *Temperature : Operating -20°C~65°C,storage -30°C~70°C
- *Battery operating life : Operating for more than 5 ~ 6 hours

Optional Accessories:

- *Hands-free speaker
- *MDT Display
- *PDA Navigator
- Suitable for:
- *Private vehicles
- *Security vehicles
- *Fleet Management
- *Taxi Dispatching System
- *Motorcycles
- *Boats
