

WE GPSP 500

GPS / GPRS Waterproof asset/animal tracker

The GPSP 500 is the smallest and the most powerful tracking device designed for pet and equipment security. Using super sensitivity GPS module and two tri-band GSM/GPRS module, the GPSP 500 can perform security and tracking for personnel, asset, pets in all over the world. It has rugged design with 100% waterproof and vibration proof. Further with very lower power consumption, and large battery, the GPSP 500 stays on duty for more than 3 days without charging the battery. The GPSP 500 has been integrated with our internet control center software for security and tracking purpose.

Features:

- * GPS and GSM dual positioning functions.
- * Embedded GSM and GPS antenna.
- * SOS emergency button for help
- * Periodic reporting using GPRS or SMS
- * Remote site continuous reporting
- * Geofence reporting to be set from the internet or on the device
- * Anti-theft reporting to be set from the internet or on the device
- * Remote listening function
- * Fast GPS and GSM signal checking using test button on the device
- * Motion sensor to detect any movement
- * Super sensitivity GPS module
- * Two tri-band GSM/GPRS module
- * Low battery indicator and SMS reporting
- * Standby and charging indicator
- * Using SIM card phonebook to set reporting number and parameters to make the interface easy
- * 100% waterproof, vibration proof, rubber covering
- * With magnetic mount for vehicle tracking
- * LED light for parking Geofence setting/release
- * Elderly no movement reporting
- * Low power consumption with large battery capacity to provide long standby time for more than 3 day.
- * Home/Car charger is available.

WISE EYE Integrated Security Solutions

Specification:

- * Size: 80mm(L) x 45mm(W) x 31mm(H)
- * Weight: 100g
- * GSM frequencies: SIEMENS MC55: 900/1,800/1,900 MHz
SIEMENS MC56: 850/1,800/1,900 MHz
- * Frequency of GPS reception: 1575.42 MHz
- * Channels of GPS reception: 16 channels
- * GPS sensitivity: -158 dBm
- * Type of location report: SMS or GPRS
- * Warm-up time: 70 seconds
- * Storage temperature: -10C to +60°C
- * Power: 3.7 to 4.2 VDC
- * Power consumption for standby: 50mA
- * Power consumption for GSM communication: 250 ma
- * Standby time: 3 days (for GPS to be always on)
- * Battery capacity: 2,400 or 3,000 mah

Other Description:

- *Portable personal SOS and tracking
- *Asset security and tracking product
- *Pet tracking product
- *Vehicle security and tracking product
- *Elderly no movement reporting (User can set the duration of no movement)
