

WE-JMPR 5160B

5 Bands x 32W (160W) Portable Jammer

The WE-JMPR 5160B is a high power jamming system, specifically designed for large areas such as prison facilities, military installations and bases.

The WE-JMPR 5160B jammers can also be mounted for protection of VIPs and military convoys.

The system is fully portable and modular, packed in pelican case containing 5 band X 32Watt each blocking wide spectrum of cellular networks with high gain directional (planer) or omni directional antennae are available.

- VIP and convoy protection
- Prison compounds
- Military base installation
- Government buildings
- Embassies

This is an ultra high powered portable cell phone jammer. It produces an incredible 160 watts of jamming power that has an effective range of up to 300-500 meters. With this sort of power, it is ideal for cinemas, recording studios, court and government buildings and very large areas. It comes complete with dual voltage mains adaptor and special antennas for optimum range and performance. This model is an extremely powerful and professional piece of equipment that performs brilliantly and features: Overheating protection, VSWR overprotection and power level adjustment and remote controlled operation so the power output can be easily adjusted to suit the area. Comes complete with mains power supply, charger and antennas.

Designed for government use, the WE-JMPR 5160B is a portable device that can jam cell phones, cellular frequency within a 100-300m' range WE-JMPR 5160B is a very high power jammer, designed for blocking down link communication radios. The WE-JMPR 5160B is using state-of-the-art technology for maximum performance.

Integrated Security Solutions

| Specification: | | | | | |
|----------------------------------|--|-------------|---------------|---------------|---------------|
| Power Output | 32Watt | 32Watt | 32Watt | 32Watt | 32Watt |
| Frequency | 851-894 MHz | 925-960 MHz | 1805-1880 MHz | 1930-1990 MHz | 2110-2170 MHz |
| Power Consumption | 400VA | | | | |
| Frequency Band Options | <u>Cellular phones standards</u> - AMPS CDMA/TDMA + Nextel (851-894 MHz) - GSM (925-960 MHz) - High GSM/DCS (1805-1880 MHz) - PCS, CDMA1900 (1930-1990 MHz) - UMTS (3G) (2110-2170 MHz) | | | | |
| Jamming Radius | Up to 100-300 meters (Actual jamming coverage achieved in each location depends on area topography, distance of the location from the nearest base station antenna and type of mobile phone) down link only. | | | | |
| Power Supply Voltage | ~230VAC / ~110VAC (standard) +12VDC (optional via DC/AC converter) | | | | |
| External battery capacity | For 2 hours continuously between charges | | | | |
| Housing | Weatherproof and shockproof "Pelican" case | | | | |
| Size | 55 x 42.2 x 26.8 cm | | | | |
| Total System Weight | Approximately 70Kg with Antennas | | | | |
| Operation Temperatures | -10° to +50°C with cooling fan | | | | |
| Humidity | Up to 80% | | | | |
| Antennae Type | 2 External high-gain directional | | | | |
| Warranty | 24 months (from date of delivery to end us | | | | |
