

WE STILETTO

MICRO VIDEO CAMERA DETECTOR

"Stiletto" is the portable optical detector, which is designated to detect micro video cameras often camouflaged in details of interior and clothes. "Stiletto" detector is portable, easy to operate and will expose even switched-off cameras with objective diameter less than 1 mm.

Tiny, smart and invisible threat may bring a havoc to your life

Relatively cheap, easy and wide spread such cameras, often concealed in casual items and used by voyeurs and spies, are a serious menace to private life, business and personal security.

Skilled answer to serious challenge

Specially designed powerful and clean optics, IR illuminator and focusing option supported by battery level indicator provide you professionally built solution to deal with unseen threat. It doesn't matter - in daylight or in darkness - if the camera is pointed at you, the device detects the camera. "Stiletto" is necessary to feel confident and calm at home, in the office, during negotiations and in hotel's room.
